PAMELLA SOARES DE SOUSA

Blockchain Engineer | Smart Contracts | Solidity | EVM | Tokenisation
Fortaleza, Brazil | +55 85 99978-5829 | pamella.soaresds@gmail.com | linkedin.com/in/pamellasoaresds | github.com/pamellasds
Open to remote work | Open for relocation to UK

SUMMARY

Blockchain developer with 5+ years of experience writing, testing and deploying Solidity smart contracts on public and private EVM networks. I have worked on enterprise and real-world asset (RWA) tokenisation, upgradeable contracts with the Diamond Standard (EIP-2535), cross-chain bridges, multisig wallets, meta-transactions and DeFi contracts for stablecoins and tokenised deposits, and took part in the ANBIMA tokenisation pilot. I led the team that built the first municipal blockchain solution for license and permit validation. PhD in Computer Science (2026), with research on blockchain developer experience published at MSR, SBES and IEEE/ACM CHASE.

SKILLS

- **Smart Contracts:** Solidity, Ethereum, EVM, OpenZeppelin, ERC-20, ERC-721, ERC-1155, EIP-2535 (Diamond), upgradeable proxy patterns, EIP-712, meta-transactions, multisig wallets, cross-chain bridges, RWA tokenisation, DeFi, gas optimisation, mainnet deployment
- **Security and Testing:** Foundry, Hardhat, Truffle, unit and fuzz testing, internal security audits, Slither, Mythril, Remix, JMeter
- **Blockchain Platforms:** Ethereum, Hyperledger Besu, IPFS
- **Web3 and Backend:** TypeScript, JavaScript, Node.js, Express.js, ethers.js, web3.js, RESTful APIs, PostgreSQL, MySQL, MongoDB
- **Data and AI:** Python (NLP and data analysis), LLMs, topic modelling (BERTopic), statistical analysis
- **DevOps and Tools:** CI/CD, Docker, Git, GitHub, Next.js, React.js, Postman, Jira, ClickUp, Figma
- **Leadership:** team leadership, Agile/Scrum, backlog management, requirements analysis, technical specifications

PROFESSIONAL EXPERIENCE

Blockchain Developer | Smart Contract Engineer, Bitshopp | São Paulo, Brazil (remote) Feb 2024 - Present

- Developed smart contracts for an enterprise tokenisation platform using ERC-20, ERC-721 and ERC-1155.
- Implemented upgradeable contracts with the Diamond Standard (EIP-2535) and OpenZeppelin, making the system modular and easier to extend.
- Developed DeFi smart contracts for stablecoins and tokenised deposits, including redemption mechanisms.
- Took part in the ANBIMA pilot on tokenisation of debentures and investment funds (with Laqus).
- Deployed smart contracts to Ethereum mainnet and to private Hyperledger Besu networks; set up CI/CD pipelines to test and deploy them.
- Wrote unit and fuzz tests with Foundry and Hardhat, and applied gas optimisation to reduce transaction costs.
- Built cross-chain bridge contracts between public EVM networks and private Hyperledger Besu networks.
- Developed multisig wallets and meta-transactions with on-chain signature validation using EIP-712 typed signatures.
- Built and documented RESTful APIs integrated with Hyperledger Besu; performed internal audits with Slither and Mythril before deployment.
- Worked with enterprise clients on their tokenisation projects and blockchain adoption plans.

IDESCO (Blockchain One and Urbe.Digital projects) | Fortaleza, Brazil May 2020 - Feb 2024

Blockchain Developer | *Team Lead, Urbe.Digital project* Oct 2022 - Feb 2024

- Led the blockchain development team for government projects in an Agile/Scrum setting; managed the product backlog and wrote technical specifications from government requirements.
- Delivered Sis.integra, the first municipal blockchain solution for license and permit validation, improving document transparency for citizens (Solidity, JavaScript, Node.js, Express.js, web3.js).
- Built Node.js and Express.js APIs connecting smart contracts (ERC-20, ERC-721, ERC-1155) to existing government systems.

Blockchain Developer | *Researcher* | *Team Lead, Blockchain One project* May 2021 - Oct 2022

- Led the research and architecture of DocStone, a blockchain API for document registration that other systems can integrate (Third Best Paper Award, SBCARS 2022).
- Developed smart contracts (ERC-20, ERC-721, ERC-1155) for DeFi applications, medical records, art authentication and asset tokenisation.
- Ran security analysis with Mythril and performance tests with JMeter on production systems.

- Research and development lead for the NFT collection "A Brief History of Ceará", published on OpenSea.

UX/UI Designer, *Blockchain One project* May 2020 - May 2021

- Designed Arqué, one of Brazil's first blockchain platforms for authorship registration (top 3 at Demoday Corredores Digitais 2020); ran competitor analysis, personas, wireframes, prototypes and usability tests.

UX/UI Designer and Quality Analyst, Ceará Valley Digital Platform (FUNCAP innovation grant) | Fortaleza 2026 - Present

- UX/UI design and quality assurance for the Ceará Valley Digital Platform.

RESEARCH

- **Visiting PhD Researcher, Brunel University London** (Oct 2024 - Apr 2025, host: Giuseppe Destefanis): mined Blockchain-as-a-Service (BaaS) repositories (Alchemy, Thirdweb, Moralis) with Python, NLP, BERTopic and LLMs to identify the main problems developers face in Web3 development.
- Research published at MSR 2026, SBES 2026, IEEE/ACM CHASE 2025, IEEE ICBC (2021, 2022) and the Journal of Software Engineering Research and Development, including Web3BlockSet (MSR 2026) and *Blockchain Developer Experience: A Multivocal Literature Review* (IEEE/ACM CHASE 2025). Third Best Paper Award, SBCARS 2022 (DocStone).

AWARDS

- Led team to 1st place (Challenge 3, Contract Management) and 3rd place (Challenge 1, Characterisation and Incorporation) at the Web3 Hackathon on Tokenisation of Federal Assets, Brazilian Federal Property Secretariat (SPU), 2022.
- Third Best Paper Award, SBCARS 2022, for DocStone.

EDUCATION

- PhD in Computer Science (Software Engineering), State University of Ceará (UECE), Brazil, 2026. Thesis: *A Multidimensional Framework for Blockchain Developer Experience*.
- MSc in Computer Science, State University of Ceará (UECE), Brazil, 2021
- BSc in Computer Science, State University of Ceará (UECE), Brazil, 2018
